**IN THE CLAIMS:**

1. (Twice Amended) A chimeric adenovirus comprising:

B'  
at least a part of a fiber protein of a first adenovirus serotype[ providing], said at least a part of a fiber protein adapted to provide the chimeric [virus] adenovirus with a desired [host range] tropism to a plurality of target cells in a host; and

at least a part of a penton or hexon protein from a second adenovirus serotype, the second adenovirus serotype having a lower relative tropism to the plurality of target cells than that of the chimeric virus, the second adenovirus serotype having [that is] less [antigenic] antigenicity in a
